### **vita peer-arne sveistrup**

---

Peer-Arne was born in Hamburg, Germany and still lives in this beautiful city.

Already during his schooldays he was interested in what was happening behind the film scenes. So he did internships in a production- and postproduction house and in a large film studio complex. After graduating he started a 2 year internship in a small postproduction house in Hamburg. He was taken over into permanent employment and worked there for another 5 years as an on- and offline editor for commercials, musicvideos and corporate films.

In 1995 Peer-Arne started his career as a freelance film editor. Since then he worked on countless projects in the music and advertising industry. But his passion always was and still is editing commercials.

With more than 25 years of editing experience and being one of the first editors in Germany using the Avid editing software he doesn't let stress or special situations get to him and he always stays focused on the task.

Peer-Arne has working experience in nearly every bigger city in Germany, in almost every european country and all over the world e.g. in China, Russia, the United States, Japan and South Africa.

His working tool is the Avid Media Composer. He also has a laptop based editing system to work independently on set, in hotel rooms or at the beach.

Peer-Arne speaks german and english.
